MANASA

COMPUTER SCIENCE GRADUATE | ASPIRING DEVOPS ENGINEER

+91 8891431898 • manasavenu88914@gmail.com • linkedin.com/in/manasa-5a795625b • github.com/manasavenu-2004

CAREER OBJECTIVE

Computer Science graduate with a solid foundation in Linux, systems engineering, programming, and core computer science fundamentals. Passionate about automation, cloud infrastructure, containerization, and building reliable CI/CD deployment pipelines. Motivated to contribute as an Aspiring DevOps Engineer while continuously expanding modern DevOps practices.

EDUCATION

Vidya Academy of Science and Technology — Thrissur, India 2022 – 2026

Bachelor of Technology in Computer Science and Engineering — **CGPA: 9.09 / 10**

BHARATH VIDYA MANDIR — Thrissur, India 2020 – 2022

Class XII — CBSE — **79%**

BHARATH VIDYA MANDIR — Thrissur, India 2020

Class X — CBSE — **85.2%**

CERTIFICATIONS

- **Red Hat Certified System Administrator (RHCSA)** — Red Hat
- **Python 3.4.3 Training** — IIT Bombay
- **SQL Programming** — Oracle
- **Python Programming** — Infosys Springboard

TECHNICAL SKILLS

Languages:	Python, SQL
Systems & Concepts:	Linux, Linux CLI, Operating Systems, Computer Networks, DBMS, Data Structures & Algorithms
Development Tools:	VS Code, PyCharm, Linux CLI, Git, GitHub
DevOps Learning Path:	Linux Administration, Git Workflows, Shell Scripting, AWS Cloud Fundamentals
Soft Skills:	Adaptability, Teamwork, Time Management, Leadership, Analytical Thinking

PROJECTS

MediTrust — Intelligent Hospital and Drug Interaction Platform 2026

- Developed an AI-powered healthcare platform for drug interaction prediction, hospital management, and patient monitoring.
- Implemented a Graph Neural Network (GNN) using PyTorch to detect harmful drug-drug interactions and improve medication safety.
- Built web and mobile applications using Django and Flutter with MySQL backend database.
- *Technology Stack: Python, Django, Flutter, MySQL, PyTorch, GNN, Gemini AI.*

Predicting Smartphone Dependency — A Machine Learning Perspective 2025

- Built an ML-based web application to predict smartphone addiction using Decision Tree and Random Forest algorithms.
- Developed a Django-based interface for user input, prediction, and performance analysis.
- Analyzed datasets using Python and Pandas to identify patterns and evaluate model performance.
- *Technology Stack: Python, Django, Scikit-Learn, Pandas, HTML, CSS.*

INTERNSHIP EXPERIENCE

Artificial Intelligence and Machine Learning Intern ICT Academy of Kerala

Developed strong hands-on skills in Python, data preprocessing, supervised and unsupervised machine learning algorithms, and AI applications. Gained practical experience through real-world projects and case studies involving predictive modeling, classification, and AI-based solutions.
